# Patent 45A: The Future of Interactive Sports Broadcasting

A highly monetizable architecture for fan participation,  
multi-layered commentary, and legally secured hot mic access.

# The monoculture sports broadcast is leaving massive revenue on the table.

## One Feed, One Voice

Every fan receives the exact same commentary register. Niche audiences remain entirely unmonetized.

## Zero Physical Impact

Fan engagement is passive. The watching crowd has no physical consequence on the field of play.

## Wasted Off-Air Gold

Raw commentary booth audio is treated as a terrifying liability rather than a premium subscription asset.

# The Three Pillars of the New Broadcast Architecture

## Pillar 1: Physical Consequence

Integrating the Fan Vote to deliver democratic data as haptic signals directly to the athlete's equipment.

## Pillar 2: Audience Segmentation

Shattering the single feed with a 7-Tier Commentary System, delivering simultaneous registers for distinct demographics.

## Pillar 3: The Ironclad Vault

Turning broadcast liability into a premium subscription asset guarded by an impenetrable legal framework.

# Breaking the physical barrier between the crowd and the athlete.

## The Consequence Loop

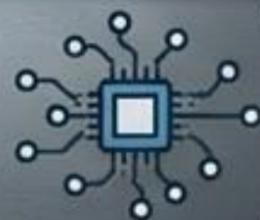

### 1. Intent

Verified Fan App initiates the vote window.

### 2. Processing

Cloud Aggregation tallies the global democratic preference in real-time.

### 3. Physical Signal

Winning result delivered as a micro-vibration haptic pattern directly to self-powered sporting equipment.

### 4. Drama

The athlete receives the physical expression of the crowd's will—and must decide to follow or override.

# The Fan Vote creates five new, highly monetizable broadcast moments per activation.

## 1: The Window Opens

Stadium displays activate.  
Sponsored broadcast graphic appears.

## 2: The Live Tally

Peak engagement window.  
The crowd reacts to watching themselves decide.

## 3: The Result & Transmission

The physical crossing of crowd will into the athlete's body.  
Broadcast cuts to player receiving haptic signal.

## 4: The Decision

Follow vs. Override. If a coach overrides the fan vote, a mandatory public explanation creates an instant, viral broadcast segment.

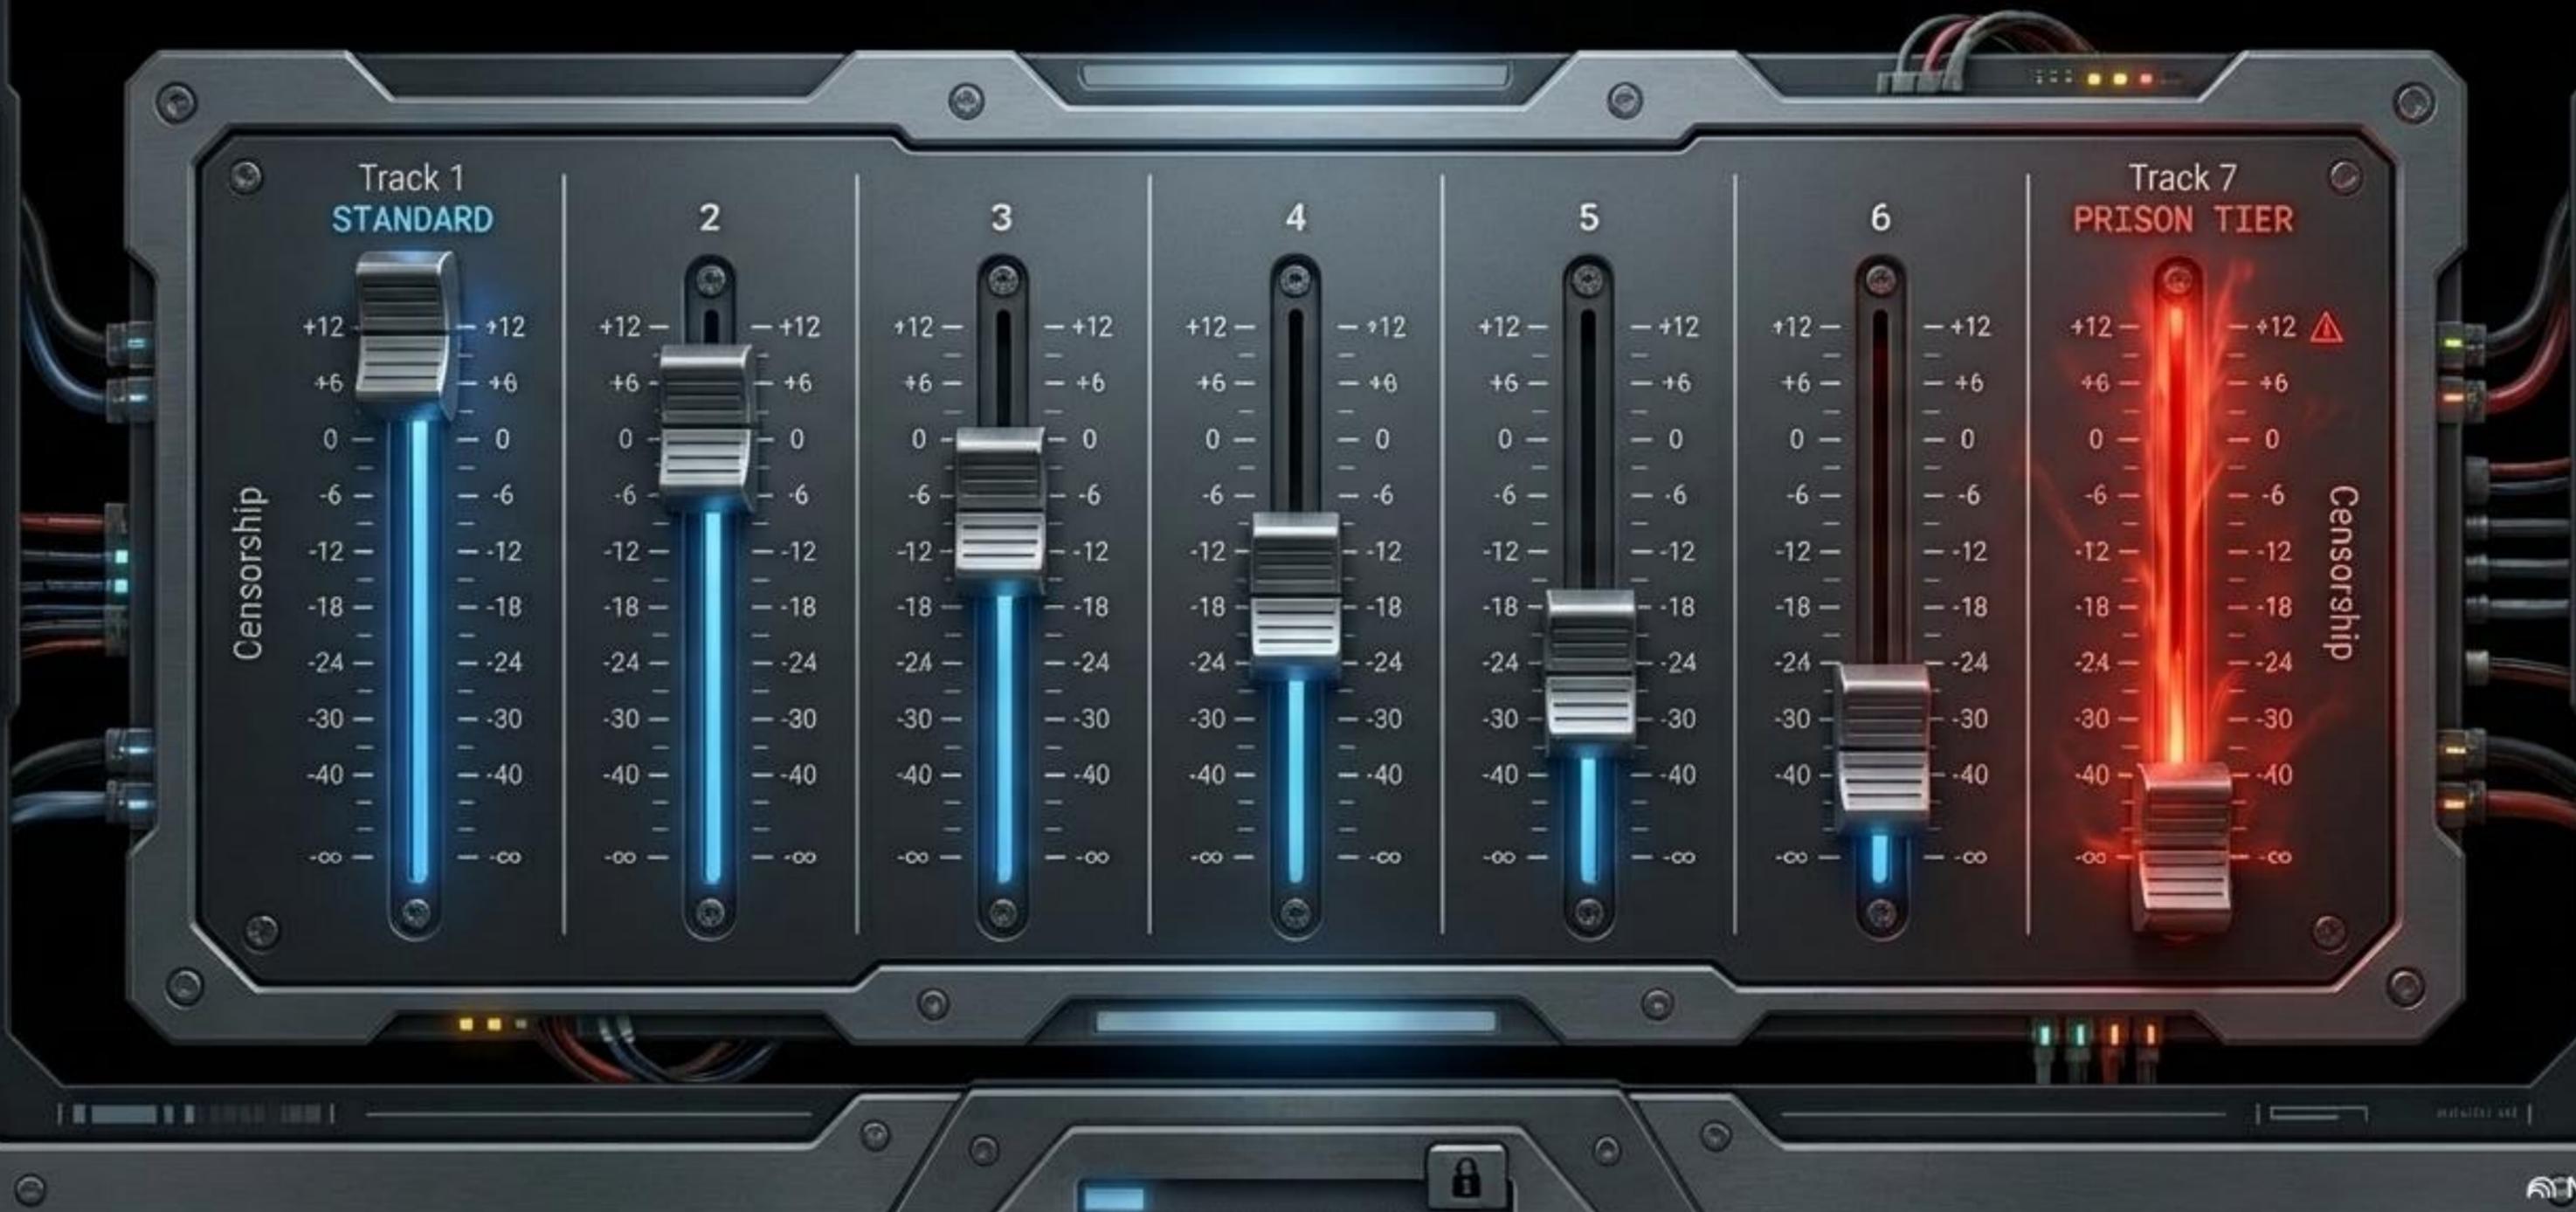

## 5: The Outcome

The play is executed. The fan decision is vindicated or overruled by reality.

# Shattering the monoculture with seven simultaneous commentary registers.

Current broadcasting forces one narrative onto millions of divergent viewers. Patent 45A captures the identical live data feed and processes it through an array of distinct commentary registers. The sport is the same. The experience is entirely customized.

# The 7-Tier Commentary Matrix

	Tier Name	Price Point	Target Demographic	Core Register	Hot Mic Access Level
1	Standard	Included	Mass Market	Professional, established team	None (Fan Vote enabled)
2	Animal Lovers	\$4.99/mo	Families/Children	Nature documentary metaphor	None
3	Bogan / Regional	\$9.99/mo	Niche Regional	Unfiltered vernacular	15-second windows per ad break
4	Public School	\$14.99/mo	Heritage/Traditional	Patrician, received pronunciation	20-second windows per ad break
5	Geriatric	\$19.99/mo	Enthusiast/Historical	Retired practitioners, tangential history	30-second windows
6	Kerry O'Keefe Premium Plus	\$99/mo	Hardcore Enthusiast	Subversive analysis, raw personality	Bathroom break hot mic fully enabled
7	Prison Tier	\$199/mo	Insider / Industry	Director comms, raw truth	Full uncensored access for entire broadcast

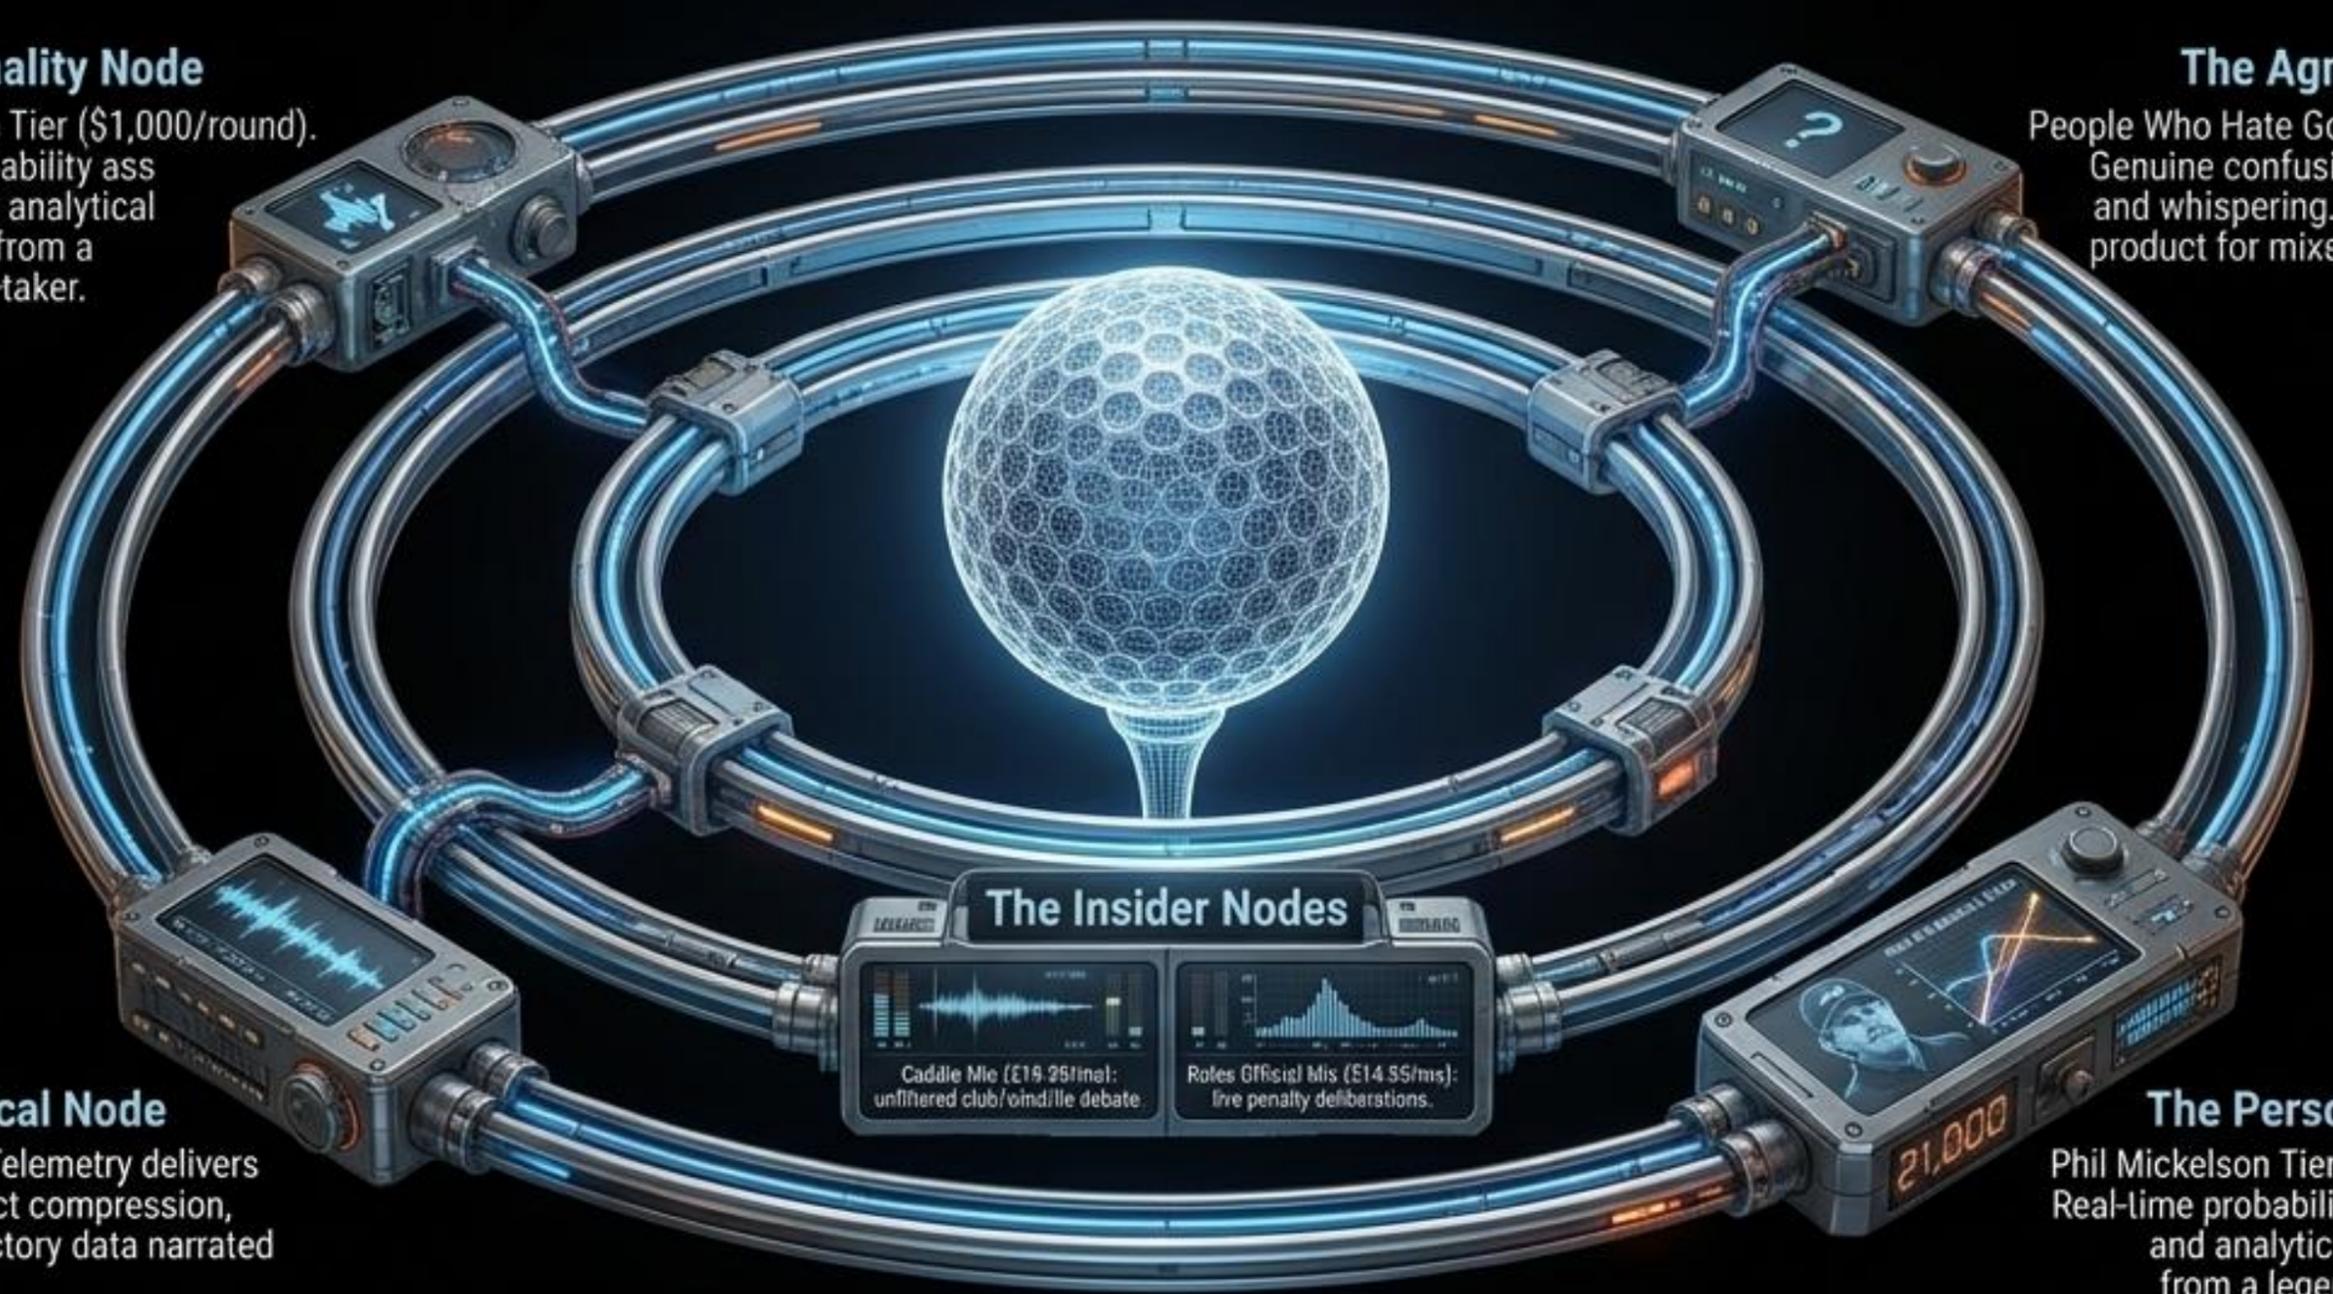

# Sport-Specific Adaptation: The Complete Golf Access System

## The Personality Node

Phil Mickelson Tier (\$1,000/round).  
Real-time probability assessments and analytical risk tolerance from a legendary risk-taker.

## The Agnostic Node

People Who Hate Golf (\$9.99/mo).  
Genuine confusion about rules and whispering. Ideal gateway product for mixed households.

## The Technical Node

Golf Ball Mic. Telemetry delivers real-time impact compression, spin, and trajectory data narrated in real-time.

## The Insider Nodes

Caddy Mic (€19.25/final):  
unfiltered club/oid/lie debate.

Rules Official Mis (€14.55/ms):  
live penalty deliberations.

## The Personality Node

Phil Mickelson Tier (\$1,000/round).  
Real-time probability assessments and analytical risk tolerance from a legendary risk-taker.

# Injecting crowd volatility directly into the pre-game broadcast.

## Step 1: Selection

90 seconds before the interview commences, subscribers vote on three curated question options.

00:00:03

## Step 2: Transmission

The winning question is routed directly into the designated broadcaster's earpiece (e.g., Martin Brundle on the Formula 1 grid).

## Step 4: Metrics

Compliance rate, improvisation quality, and the subject's raw reaction are tracked and delivered as engagement metrics.

COMPLIANCE RATE

78%

IMPROVISATION QUALITY

43%

REACTOR

## Step 3: Execution

The broadcaster retains the right to improvise delivery style, but MUST address the subject matter chosen by the fans.

# The Hot Mic Paradigm Shift: From terrifying liability to premium asset.

## The Old Model (Liability)

1. Hot mic captures authentic commentator banter.
2. Broadcaster panics and cuts the public feed.
3. Apology issued.
4. PR crisis ensues.
5. Revenue lost.

## The CoreMason Model (Asset)

1. Broadcaster selectively captures the hot mic event.
2. Audio is funneled exclusively to the \$199/mo Prison Tier.
3. The decision to cut the public feed BECOMES the premium content.
4. Drives massive, high-value subscription upgrades.

# The Digital Vault: Total, absolute legal protection for broadcast talent.

The Prison Tier works only if commentators feel completely safe to be authentic. Patent 45A surrounds the hot mic with an impenetrable legal and technical fortress. Audio captured here MUST stay strictly inside the premium subscription.

## The Ironclad Ring-Fence

### The Commentary Booth

Raw, Uncensored, Authentic,  
and Creatively Free

Strict Premium Paywall

Unique Audio Watermarking (Per-User Tracking)

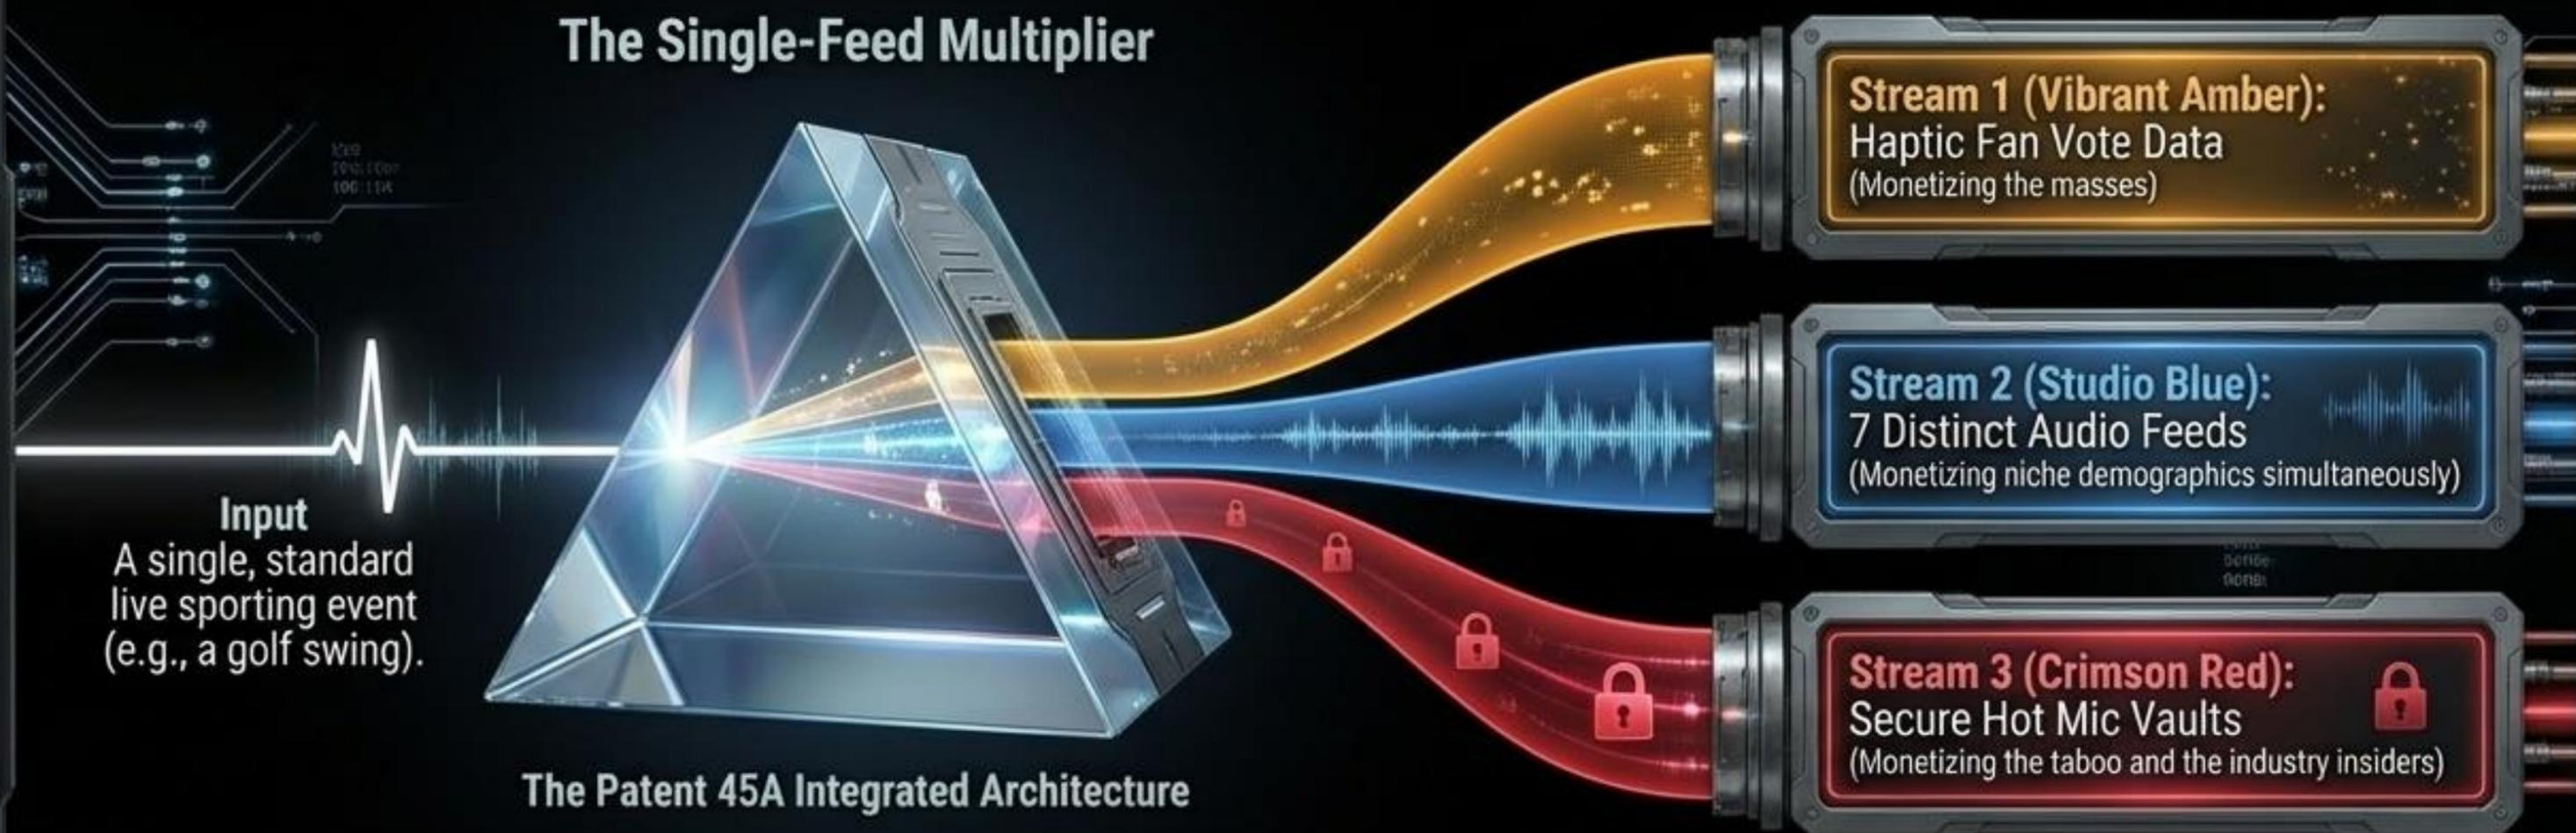

Binding Non-Disclosure Terms of Service

**LEAK DETECTED → AUTOMATIC DEFAMATION LAWSUIT & LIFETIME BAN**

Pre-authorized, ironclad grounds to sue the leaker for defamation and breach of contract.

# The Single-Feed Multiplier: Maximizing the ROI of existing broadcast rights.

## The Single-Feed Multiplier

Broadcasters do not need to produce more sports. They simply need to process the existing sport through this architecture to multiply revenue streams while entirely mitigating legal risk.

**The future of broadcasting is  
multi-layered, interactive, and ironclad.**

Patent 45A transforms the passive spectator into a physical participant, the monoculture feed into a bespoke demographic register, and the hot mic liability into a legally fortified premium asset.

For everybody. Always. Riverrun. | CoreMason Technologies 2026.
